B	Rail Timetable Information <i>(Correct at Time of Collating Data and Writing Report)</i>

1.0 INTRODUCTION

- 1.1 NRB Consulting Engineers Ltd were appointed to address the Bus and RAIL Demand and capacity associated with a planning application for a proposed residential development on lands at Confey, Leixlip, Co Kildare.
- 1.2 The Development is a Large-scale Residential Development (LRD) on the appropriately zoned site at Confey, comprising a total of 125 No. Residential Units (81 No. Residential Houses and 44 No. Apartments / Duplexes). Refer also to Detailed Development Description included within Section 2.0 of the TTA Report and the Site Notice.
- 1.3 The NRB commission on the project consists of this assessment of current and future Bus and Rail capacity, a 'Bus and Rail Capacity Assessment Report'.
- 1.4 Whilst this Report contains an assessment of Bus & Rail Capacity and demand, it should be remembered that Service Providers are commercial in nature, running their businesses based on current demand rather than medium to longer term future demand. In simple terms, commercial services are provided based on actual existing footfall rather than potential future demand. If there is an increased demand for services (for example with full or over-capacity services), Operators then generally react to improve facilities if it makes commercial sense to do so. More customers means more revenue generated by the services.
- 1.5 Notwithstanding the above, the purpose of this Study is to review the potential impact of the development upon the existing and future bus and Rail services in the vicinity of the site.
- 1.6 The analysis of the existing and future services is based on an assessment methodology which includes trip generation assessment, modal split assumptions, and assignment/distribution. These assumptions have been based on real data extracted from the Central Statistics Office (CSO) 2022 Small Area Map Data, available through the SAP online mapping tool. This data was used to quantify the anticipated demand for services as a result of the proposed development locally, based fully CSO Statistical data for Leixlip.
- 1.7 The first step was to review the current and future planned services. The closest bus stops within an easy walking distance of the subject site were identified, with the current bus services, bus service frequency and capacity studied and assessed. Similarly, the demand for Rail services at the nearest stop (Confey) was assessed based on current provision.

- 1.8 *BusConnects* is expected to be implemented within a relatively short timeframe. This initiative will reconfigure the bus services for the Greater Dublin Area completely including Leixlip. This Study therefore considers both the existing bus network and the planned *BusConnects* Network.
- 1.9 The current and future improved Rail services are also considered within the Report.
- 1.10 The Study focuses on the peak commuter periods for the development, and in particular the busiest weekday AM commuter peak demand for services – this represents the period of highest demand on the network consistent with the TII Traffic & Transport Assessment Guidelines (May 2014).
- 1.11 The methodology assumes that the trips will be assigned to the nearest available bus stops and of course to Confey Railway Station, which is closest Station, and which has good alternative transports links to it already in place

2.0 BUS/RAIL LOCATIONS AND SERVICES (CURRENT AND FUTURE)

CURRENT SERVICES

2.1 For commuting, a walk distance to/ from Bus Stops of up to 700m-1km is generally considered to be acceptable. For the purposes of this assessment however we have selected the current bus services within the immediate perimeter of the site running along Captains Hill only.

2.2 These services include the following:

- Dublin Bus Service #L54 (Riverforest to Red Cow / Return),
- Dublin Bus Service #L58 (Riverforest to Hazelhatch / Return), and
- Dublin Bus Service #59 (Riverforest to Hazelhatch / Return).

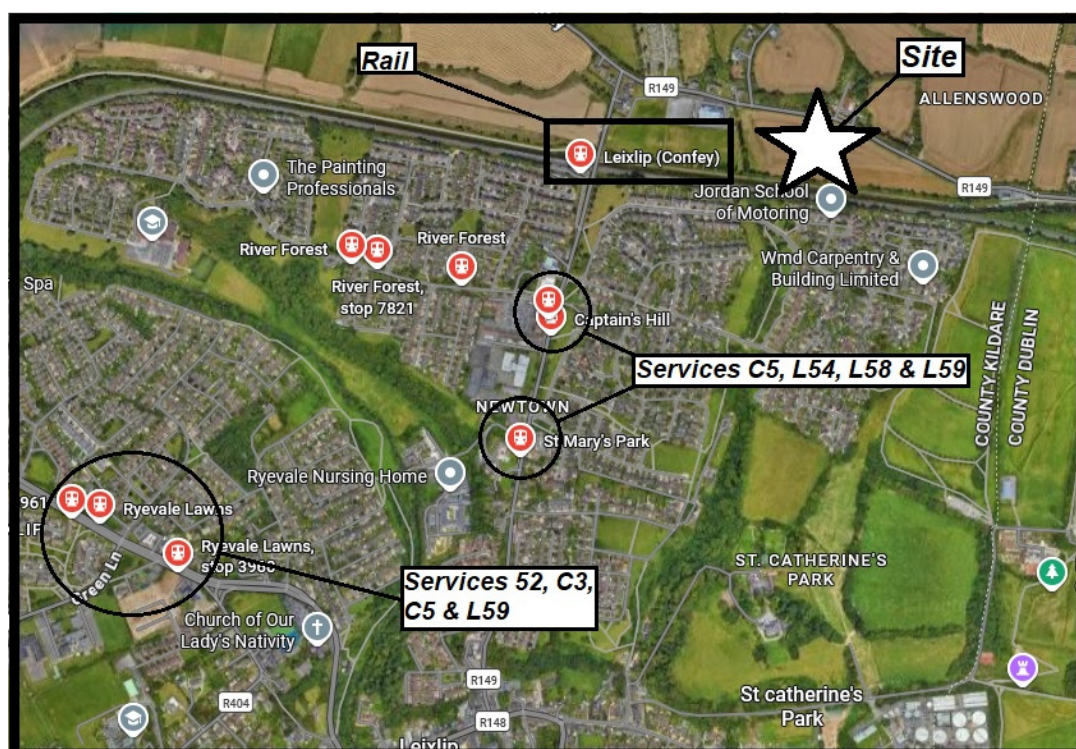

Figure 2.1 – Existing Bus Stops & Site Proximity to Rail (Correct at Time of Writing)

2.3 The current timetable for each of these locally available bus services (which are current and correct at the time of writing) are appended to this Report. All of these existing bus and rail services stop within an easy walking distance of the site, particularly with connectivity to the Greenway, as illustrated above on annotated Google Images as **Figure 2.1**.

- 2.4 The scheme delivers pedestrian and cyclists connections directly onto the Royal Canal Greenway, providing for permeability for all pedestrians and accessibility to Bus services and to RAIL services, as illustrated above.
- 2.5 In terms of the **Existing Bus Service** Provision and Service Frequency, the Timetables for each of the existing Services are appended hereto. These details have been collated and are summarised below as **Table 2.1**, extracting information relating to the busy 7-9am weekday AM Commuter Period.

Table 2.1; - Buses within Easy Walk Distance, 7-9am Approx Capacity.

Service #	Route	Operator	No. Buses 7-9am (Mon - Fri)	Total Person Capacity (7-9am)	Thru City (Y/N)
L54	Riverforest to Red Cow & Ret	Dublin Bus	4	364	Y
L58	Riverforest to Hazelhatch & Ret	Dublin Bus	2	182	Y
L59	Riverforest to Hazelhatch & Ret	Dublin Bus	4	364	Y
Total (7-9am) All Routes			10	910	
Total (7-9am) Routes Via City Centre			10	910	

- 2.6 The above demonstrates that the site is clearly accessible to a significant existing bus provision, with a capacity of approximately 910 bus seats during the 7-9am commuter peak period, all within an easy walk-distance of the site.
- 2.7 And the bus services provide for connectivity to Public Transports Hubs and Interchanges (Rail, Intercity Bus Services, RAIL etc) located on the approach to and within the City Core.
- 2.8 Leixlip Confey Railway Station is currently served by the **Commuter Rail** (Western Commuter line) operated by Iarnród Éireann (Irish Rail). However, as part of the ongoing *DART+ West* project, plans are in place to extend the electrified DART network to serve Leixlip, Maynooth, and Kilcock in the future. The **Dublin Area Rapid Transit (RAIL)** is the long-established electric rail system and is a quick and easy way to get around Dublin. The service operates on a frequency of approximately every 10 minutes all day. The full current Rail timetable for Confey Station can also be found appended hereto.
- 2.9 We have assessed the Rail Service intervals during the weekday 7-9am period, and the approximate total Rail people capacity is then illustrated below as **Table 2.2**.

Table 2.2; - Rail Approximate Existing Capacity Each Way (7-9am)

Train Capacity/Demand Details	No. 7-9am	People Capacity
Commuter Services Leaving Leixlip Confey Stn 7-9am*	7	819
Total Approx People Capacity 7-9am	5733	

- 2.10 The Transport for Ireland & Irish Rail websites (and Mobile Phone Apps) now provide a service that allows customers access up to date real information for Arrivals and departures on a stop-by-stop basis. This information on Arrivals and Departures allows customers to plan their arrivals and departures & associated walk/cycle times accurately, facilitating efficient journey planning (and minimising congestion on platforms or stops).
- 2.11 Transport for Ireland also provides an interactive online tool that enables the user to plan journeys, with real time information on Bus & Rail services on a nationwide basis. We have also set out below details of the proposed future improvements to the Rail Services to Confey and also bus service improvements locally as part of *Bus Connects* plans.

FUTURE BUS SERVICES

- 2.12 In terms of **Future Planned Services**, the NTA have recently published details of the overall bus network for the GDA, the 'New Dublin Area Network' - showing Spine Routes, Feeder and Orbital Routes. An extract from the NTA Plans showing the site location is included below as **Figure 2.2**.

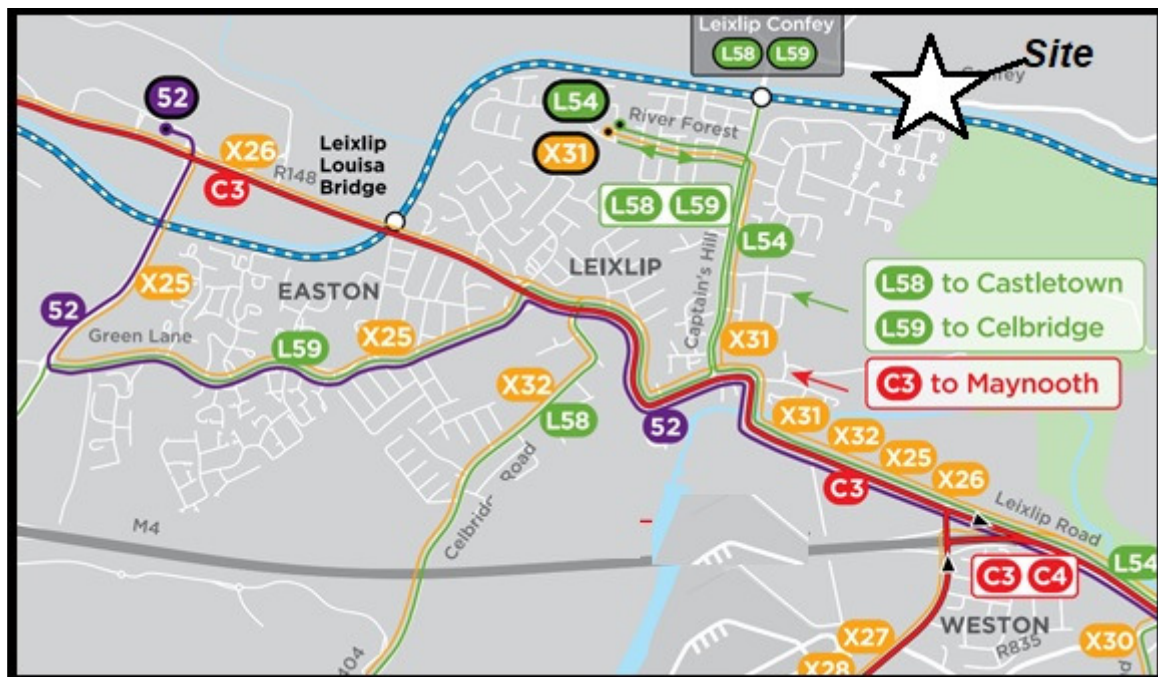

Figure 2.2 – Extract Current NTA Bus-Connects Network Plan and Site

- 2.13 Phase 2 of the BusConnects Network Redesign launched on 28th November 2022 in West Dublin and East Kildare. This phase introduces the C-Spine (C1, C2, C3, C4), route 52, eight peak only routes (P29, X25, X26, X27, X28, X30, X31 and X32) and six local routes

(L51, L52, L53, L54, L58 and L59). Two night-time routes (C5 and C6) have also been introduced.

- 2.14 The site is therefore ideally placed in terms of future frequent bus availability, based on the NTAs published Plans, many of which services are already in place.

FUTURE RAIL SERVICES

- 2.15 The DART & DART West projects are crucial milestones in further expanding and transforming the rail network in the Greater Dublin Area. The Government has also approved the preliminary business case for the wider DART+ Programme, which will:
- Double passenger capacity per hour to 52,000 and treble the length of the RAIL network to 150km;
 - Facilitate sustainable mobility and transport-orientated development in the capital and surrounding counties; and
 - Provide clean and green electrified rail services in line with the targets set in the Climate Action Plan.
- 2.16 Funded under the National Development Plan, DART & DART West and Coastal South are key to the entire programme and the approved projects will see construction of a new depot near Maynooth as well as electrification of the current Maynooth Line and upgrade of infrastructure at both Connolly and Docklands stations in the city centre, and significant upgrades on the Coastal Line serving Seapoint.
- 2.17 The residents of the site will be ideally located to take advantage of the proposed DART Expansion Programme which is a cornerstone project of the Transport Strategy for the Greater Dublin Area 2016 - 2035, and which will see the DART system expanded, providing fast, high-frequency electrified services to the Confey on the Maynooth/Sligo Line.

- 2.18 In terms of **Bus Passenger Capacity**, the Dublin Bus services and a typical old-type Dublin Bus double decker bus have a capacity to accommodate ~91 passengers. However, it should be noted Dublin Bus are introducing new hybrid buses, some of which have extra capacity e.g. the new Wrightbus StreetDeck HEV 96 double-decker buses.

3.0 BUS USE PREDICTIONS, CAPACITY AND DEMAND

- 3.1 We have used the 2022 CSO National Census (Local Small Area Mapping tool) to establish the proportion of Bus and Rail Users within Leixlip Town in order to estimate the additional demand for services, utilising real data rather than simple estimations of modal split. An annotated extract from the CSO Database showing the Leixlip Area Studied is included below as **Figure 3.1**.

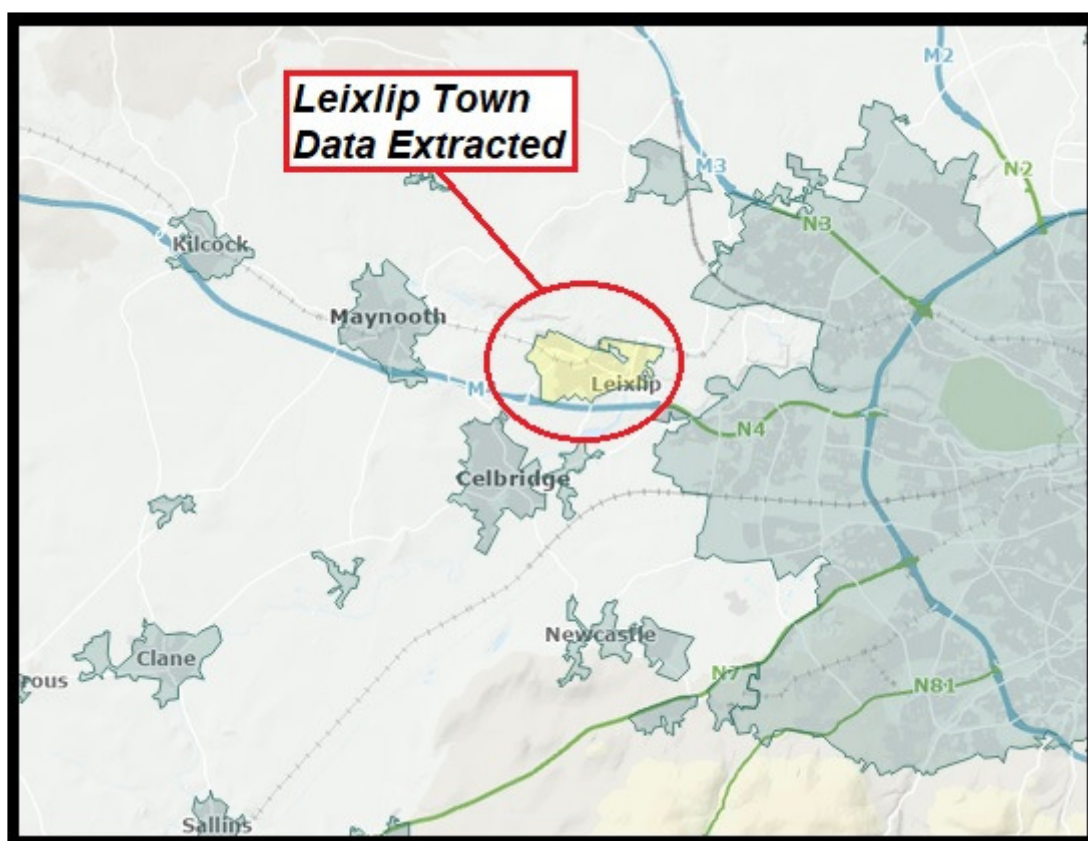

Figure 3.1 – Collated CSO Local Area Data for Leixlip

- 3.2 We have extracted information from the Census Data for the Town of Leixlip to calculate the demand for Bus & Rail during the busy weekday AM Commuter period, and this is illustrated below as **Table 3.1**.
- 3.3 The busy AM period represents the worst-case demand for Buses/Rail services for assessment purposes, as ‘peak spreading’ or staggered commuter departures occurs during the evening commuter peak, meaning that the AM Peak Hour represents the more onerous or worst case.

Table 3.1 – Bus & Rail Demand Based on CSO Data & Expected Residential Numbers

Leixlip Area	Total Population	Total Commuters Travel to Work	No. of Bus Users	No. of Train Users	Percentage of All Commuters Leaving Home 7-9am to Work
CSO Extract	16733	7823	630	667	61.8%
CALCULATION OF BUS & TRAIN DEMAND DUE TO DEVELOPMENT BASED ON LOCAL CSO DATA					
Percentage of Total Population in Area Commuting 7am to 9am to work =					46.8%
Percentage of Total Population in Area Commuting By Bus =					3.8%
Percentage of Total Population in Area Commuting By Train =					4.0%
343	Residents within Occupied Proposed Development, based on Bed Spaces				
13	Bus Commuters (Consistent with the Local Area Census Data)				
6	Total Additional Bus Commuters Between 7am and 9am				
14	Train Commuters (Consistent with the Local Area Census Data)				
6	Total Additional Train Commuters Between 7am and 9am				

BUS/RAIL CAPACITY & DEMAND

- 3.4 Based on exiting travel patterns in the locality, the above confirms that the Development will create an additional worst-case demand for approximately 6 seats on bus services between 7am and 9am. There will be an additional worst case potential demand for 6 Rail seats between 7am and 9am. Of course, it is not possible to predict the commuting destination of future residents. Although it would sensibly be expected to be towards Dublin City centre.
- 3.5 The predicted increased service demand should be considered in terms of the available capacity locally, for both Buses and RAIL.
- 3.6 In terms of **Buses**, the demand is illustrated in **Table 3.2** below - with c.910 bus seats available nearest the site during the weekday AM commuter peak period. There are a similar number for services and seats during the weekday PM Peak period 4pm-6pm, however demand is greater during the weekday AM Peak (due to 'peak spreading' that occurs in the evenings, with much more significant staggered departure times from work or College locations).

Table 3.2; Total Peak Demand for Bus Seats Due to Development

Details	Buses	Seats
Total Number of Buses (7-9am) All Routes	10	910
Total Number of Buses (7-9am) Routes Via City Centre	10	910
Total Demand for Seats Created by Proposed Development (7-9am)		6
Percentage Impact Upon Existing Services Closest to Site (All Routes)		0.7
Percentage Impact Upon Existing Services Closest to Site (Routes Via City)		0.7

3.7 The resulting increased demand for bus seats is less than 1% of the total available 7-9am seat capacity locally. This is considered negligible, and we believe it can easily be accommodated within the current service provision. This is particularly the case given that the demand for services is generally accepted to vary +/-10% due to day-of-week or weather conditions.

3.8 In terms of **Rail** services, the demand associated with the development is illustrated in **Table 3.3** below & this was used to calculate the demand and impact upon services.

Table 3.3; Total Peak Demand for RAIL Due to Development

Train Capacity/Demand Details	No. 7-9am	People Capacity
Commuter Services Leaving Leixlip Confey Stn 7-9am*	7	819
Total Approx People Capacity 7-9am	5733	
Total Demand Created by Proposed Development	6	
% Additional Demand Created	0.11%	
* Based on published details of Trains Capacity being 185 Seated and a Total of 819 incl Standing for a 4-Car Train		

3.9 The proposed development will therefore also create an additional demand for Rail seats, equating to 0.11% of the current carrying capacity. This is also considered negligible and we believe it can easily be accommodated within the current service provision.

3.10 In terms of assessing current service capacity of Buses and Rail, details of seat or space availability on any particular individual service, at any particular stop, is just not available. Service operators themselves accept cash fares, and as a result the availability of space for additional passengers cannot be accurately measured using Leap-Card software output (commercial information which is unavailable to us in any event).

3.11 We therefore undertook a sample observation survey of the space availability on buses and Rail Trains on Wednesday 13th & Thursday 14th May 2026. We observed occupancy at the local bus stops, together with observation of Rail Train occupancy at Confey Station. The demand for services appeared greater on Thursday 14th May, and we have therefore used observations on the Thursday for the purposes of this assessment.

3.12 For the **Bus Services**, we observed occupancy over a one-hour period on both days at Bus Stops #3993 and #3996 (between 730am to 830am). This observation survey confirmed that the buses are running with significant seat/space availability on both days, with the maximum observed occupancy being c 60 people on a standard bus at both inbound and outbound stops surveyed (bus capacity being 91 persons). We conclude that the additional demand for Bus services created by the development can be

accommodated within the existing services, as there appears to be adequate capacity available.

- 3.13 In terms of **Rail Services**, we observed Train arrivals & departures over the 2 days for a 1-hour period on each day (also 730am to 830am). During this time all waiting passengers were able to board the next available train. This would also appear to confirm that there is adequate capacity in the existing Rail service to accommodate the additional demand created by the proposed residential development
- 3.14 We conclude that this additional demand for Rail and Bus services can be accommodated within the existing services. In future, there are additional services to be created as part of Bus Connects as set out within Section 2.0 above, with additional further improvements to Rail Services. There will also therefore be more than adequate capacity on the further improved services locally.
- 3.15 The analysis is based on 2022 CSO travel patterns, and whilst the development seeks to encourage modal shift, given the relatively small increase in predicted bus and Rail demand, any possible future changes in demand due to improve modal shift (walking, cycling, increased working from home and public transport etc) will still have a small impact on bus or Rail capacity here.

4.0 CONCLUSIONS

- 4.1 NRB Consulting Engineers Ltd were appointed to address the Bus & RAIL demand and capacity associated with a planning application for a proposed residential development on lands at Confey, Leixlip, Co Kildare.
- 4.2 The analysis of the existing and future Bus/RAIL services has been undertaken based on an assessment methodology which includes trip generation assessment, modal split assumptions, and assignment/distribution. These assumptions have been based on real data extracted from the Central Statistics Office (CSO) 2022 Small Area Map Data, available through the CSO online mapping tool. This data was used to quantify the anticipated demand for Bus/Rail as a result of the proposed development in this particular location, utilising current local modal shift patterns & statistics, based on the maximum anticipated residential population of the scheme.
- 4.3 This Report contains details of current and future Bus & Rail Services and Bus & Rail Capacity serving the site and the local area. The assessment confirms that the completion and full occupation of the development will result in an increased demand for Bus/Rail seats, with an additional 6 Bus customers and 6 Rail customers during the weekday AM Commuter Peak hours 7-9am (and less during the PM Commuter peak period). This represents a total of 0.7% of the Bus capacity and 0.11% (ie both less than 1%) of Rail capacity locally during this AM Period. The study also includes details of seat/space availability of existing services locally, based on an observation survey over 2 days.
- 4.4 We conclude that the additional demand for Bus/Rail trips as a result of the proposed development can be accommodated on the existing and future improved services in the area without any significant effect.
- 4.5 Whilst this Report contains an assessment of current capacity, it should be remembered that service providers are commercial in nature, running their businesses based on existing demand, rather than medium to longer term future demand. If there is an increased demand for services, or indeed if there is a deficit in a service provision, Operators generally react to improve facilities if it makes commercial sense to do so. More customers means more revenue generated.
